

## INTRODUCTORY.

The publisher takes pleasure in presenting to the citizens the seventh volume of Caron's New Albany and Jeffersonville City Directory, it is in every respect an improvement on its predecessors. The New Albany department contains eight thousand six hundred and twenty-five names, (8625) an increase of six hundred and eleven (611) over 1884. The Jeffersonville department contains four thousand one hundred and fourteen names (4114) a falling off of five hundred and eleven names (511) since 1884. The usual method of arriving at the number of inhabitants, is by computing from the names contained in the Directory, by multiplying the whole number presented by three (3), which is considered by publishers as a fair estimate. If we take three as a multiple, New Albany has a population of twenty-five thousand eight hundred and seventy-five (25875), an increase of one thousand eight hundred and thirty-three (1833), while Jeffersonville has twelve thousand three hundred and sixty-two (12342), a falling off of one thousand five hundred and thirty (1530). Strangers will quite naturally ask what were the causes which led to the falling off in the population of Jeffersonville—the question is easily answered. The great floods of 1883 and 1884, at which time five-eighths of the city was under water, and the closing down of the Ohio Falls Car Company in 1884, which employed from two thousand to twenty-five hundred men. These great drawbacks, however, have been entirely overcome, first, in the United States Government building a levee in front of the city, and second, the resumption of work at the Ohio Falls Car Co. on August 1st, 1886. The publisher has great faith in the outcome of Jeffersonville.

Mr. S. D. Smith has had charge of the canvass and compilation of the work, and his carefulness and accuracy will be evident to all by a consultation of its pages.

C. K. CARON.

## FIRE DEPARTMENT.

The fire department of the City of New Albany has been conducted as a paid department since 1865. As now constituted, with one hook and ladder truck and three reel carriages, it is sustained at an annual expense of about \$25,000, which includes the cost of fire-plugs. The use of fire-plugs throughout the city has made the service of two steamers useless. Charles T. Matthews, chief engineer; office, East Market, cor 18th.
